

layer, the second silver layer being over the second dielectric layer, the second primer layer being over the second silver layer, and the film of an oxide of an alloy or mixture of zinc and tin being over the second primer layer.

Claim 62 (currently amended). The coated article of claim 4 wherein there are first and second infrared reflective layers, first and second dielectric layers, and further comprising:

first and second metal primer layers; and

a film of an oxide of an alloy or mixture of zinc and tin having 10-90 weight percent zinc and 90-10 weight percent tin over the primer layer, the coated article is characterized by the first dielectric layer being over the substrate, the first infrared reflective layer being over the first dielectric layer, the first metal primer layer being over the first infrared reflective layer, the film of an oxide of an alloy or mixture of zinc and tin being over the first primer layer, the second silver layer being over the second dielectric layer, the second primer layer being over the second silver layer, and the second dielectric layer being over the second primer layer.

#### **REMARKS**

Claims 4, 7, 9, 21 and 59-62 have been amended. The proposed amendments do not contain new matter. The support for the amendments is discussed below

1. In re Amendment to Claim 4

Support for the amendment that changes "silicon oxynitrate" to "silicon oxynitride" can be found at page 12, line 9 of the originally filed application.

2. In re Amendment to Claim 9

Support for the "metal primer layer" is found in the originally filed claims.

See claim 7.

3. In re Amendment to Claim 7

Certain obvious amendments have been made to correct typographical errors.

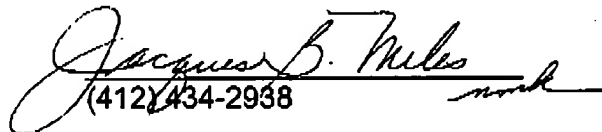

4. In re Amendments to Claims 4, 21 and 59-62

Support for adding the term "mixture" to the already existing phrase "alloy of zinc and tin" can be found at page 3, lines 30 and 31 of the originally filed application. A "zinc oxide, tin oxide film," is defined as a film having oxides of tin and zinc. This definition includes both alloys and mixtures.

In light of the amendments and remarks presented in this correspondence, Applicants respectfully request admission of the amended claims 4, 7, 9, 21 and 59-62. If any questions remain about this application, the Examiner is requested to contact Applicants' attorney at the telephone number provided below. Thank you.

Respectfully submitted,

JACQUES B. MILES
